SUMMARY

Results-oriented IT professional proficient in cloud computing (AWS Certified) and Java programming (NPTEL certified) with over one year of experience in object-oriented programming. Experienced in enterprise programming with skills in servlets, JDBC and JSP demonstrated through the development of a Course Management System.

WORK EXPERIENCE

- **campus CEO intern** – swiggy (Feb 2024 - Apr 2024)
- **Marketing intern** – Sharewheelz (Apr 2024 – june 2024)

PROJECTS

Reserve My room

[git](#)

- A hotel booking system requires different levels of access for various users: customers, hotel staff, and administrators. Implementing secure authentication (login, registration, password management) and authorization (roles and permissions management) in Django to control access to different parts of the system is crucial.
- I implemented a unified Login System where both users and staff access the same interface. Users were granted the flexibility to choose their own username for login instead of requiring their email each time, while staff were restricted to using their employee identification numbers for authentication.
- Users can log in to our web application seamlessly, choosing their preferred usernames instead of their email addresses.

Course management system

[git](#)

- Integrating assignment uploads, downloads, and submissions across student and faculty interfaces while ensuring secure course registrations and user authentication.
- Engineered a streamlined process using database-stored drive links for efficient assignment submissions. Implemented role-based access control with session management for each role. Leveraged Hash Maps and Array Lists to dynamically fetch and display course-specific videos via HTML video tags.
- Streamlined assignment management with seamless user experience. Facilitated engaging learning experiences through integrated multimedia resources.

EDUCATION

B.Tech at Koneru lakshmaiah education foundation, Guntur
Intermediate at Sree chaitanya junior college, kavali
Schooling at Sri chaitanya English Medium High school kavali

Aug 2022 - Jun 2026 (GPA: 9.69)
Aug 2020 - May 2022 (Percentage: 93.8)
Jul 2020 (Percentage: 100)

SKILLS

Web Development:- HTML,CSS,servlet,JSP,JSF
Frameworks:- Django,JPA
Database:- PostgreSQL, mySQL
Data structures and OOPS:- Java
Cloud:- AWS services
Tools:- AWS console
